Commitment Towards Quality and Safety

We are operating adopting International principles in our service to ensure customer satisfaction.

Quality is our way of life in service. Keeping a record of most of the awarded contracts ,right from the day one , shows our commitment towards customer satisfaction.

We have very well established procedures . We adopt and implement health and safety practices in our work environment to assess and control risks and eliminate them efficiently. This ensures job satisfaction in our employees.

Our Management team is trained and certified in ISO 9001:2008, ISO 2200:2005 and OHSAS 18001 : 2007. This ensures the continual training and sustainability.

Project Delivery

TKGC has adopted and introduced a corporate-wide project delivery mechanism which ensures that all our projects adhere to consistent standards of project delivery. This ensures that the client receives the benefit of proven project management techniques and 'lessons learned' on previous projects.

TKGC has found that by implementing this framework it is possible to reduce superfluous work, encourage consistent service delivery, and improve the performance of in-service staff. Our senior staff receives ongoing training and implement these systems on a routine basis using approved Policy and Procedures.

Social Commitment

Waste Reduction: Since productivity has bearing on Waste Management all measures are taken to ensure wastage reduction in our operations.

Environmental Protection: Being needless to emphasis awareness towards environmental protection the care is exercised in this direction at all levels.

Core Values

Be proactive in assessing health, safety and environmental hazards in new and existing projects.

Encourage team problem solving at all levels of the organization.

Implement work practices that continually improve safety, environmental standards and productivity.

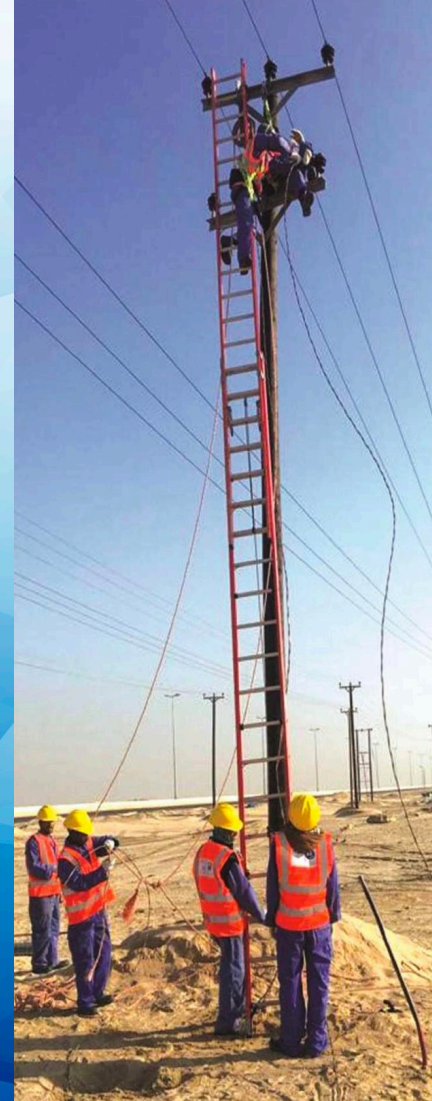

Report and investigate accidents and safety incidents and implement systems and practices that prevent recurrence.

Ensure compliance with legislative requirements and current industry standards. Train all employees to perform work competently (described in safe work procedures).

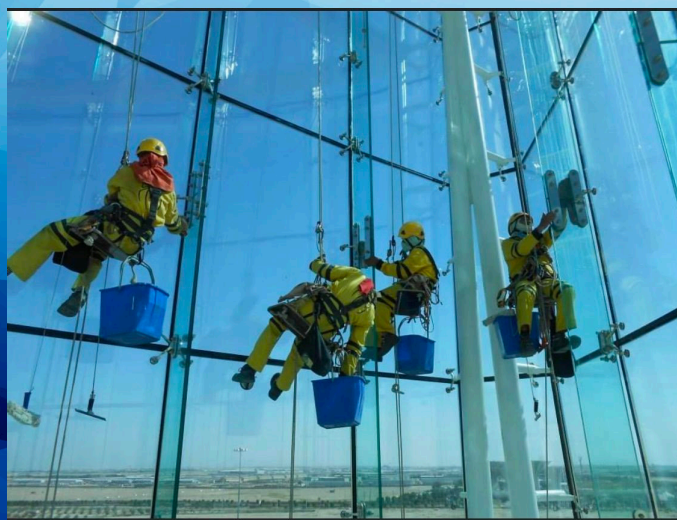

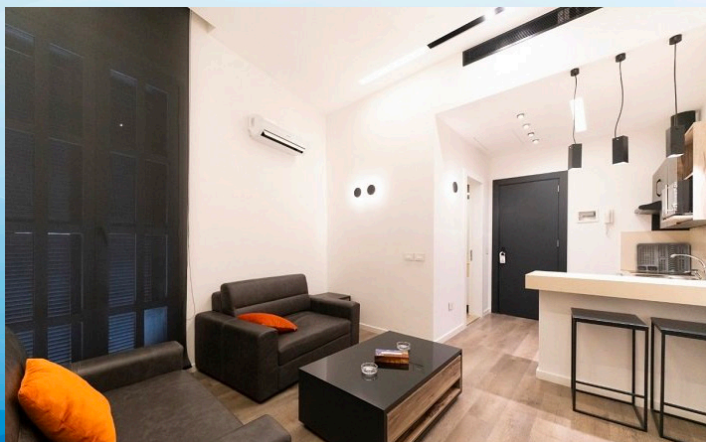

Provide information to all employees, contractors and customers regarding health, safety, and environment issues relevant to the company's operations.

Reduce and recycle waste materials wherever practical and dispose off waste materials in an environmentally feasible manner.
